

**SOLAR
ENERGY
VENTURE**

ABOUT US

Founded with a humble objective of contributing our efforts to the betterment of mankind Green Sun Solar initiated research and product development of Solar PV based systems in 2016.

We offer wide range of products and services for Residential, Commercial, Agricultural and industrial use.

MANAGEMENT

Mr. Naresh Bidawatka
Promoter, Managing Director

C.A. Harsh Bidawatka
General Manager

VISION

To create a sustainable future and simplify human life using natural, free source of energy processed by today's cutting edge photovoltaic technology. To constantly innovate, inspire and implement the idea of clean energy using best product component that ensures highest yield.

WHAT WE DO?

We design and develop wide range of Solar Power Plants

- Grid Connected Solar Roof Top Project
- Off grid Solar Plant
- Surface/Submersible Solar Pump
- Solar Street Lighting System
- Installation & Commissioning Services

We offer end to end solutions for installing Rooftop Solar Plant.

Why Solarise Your Rooftop?

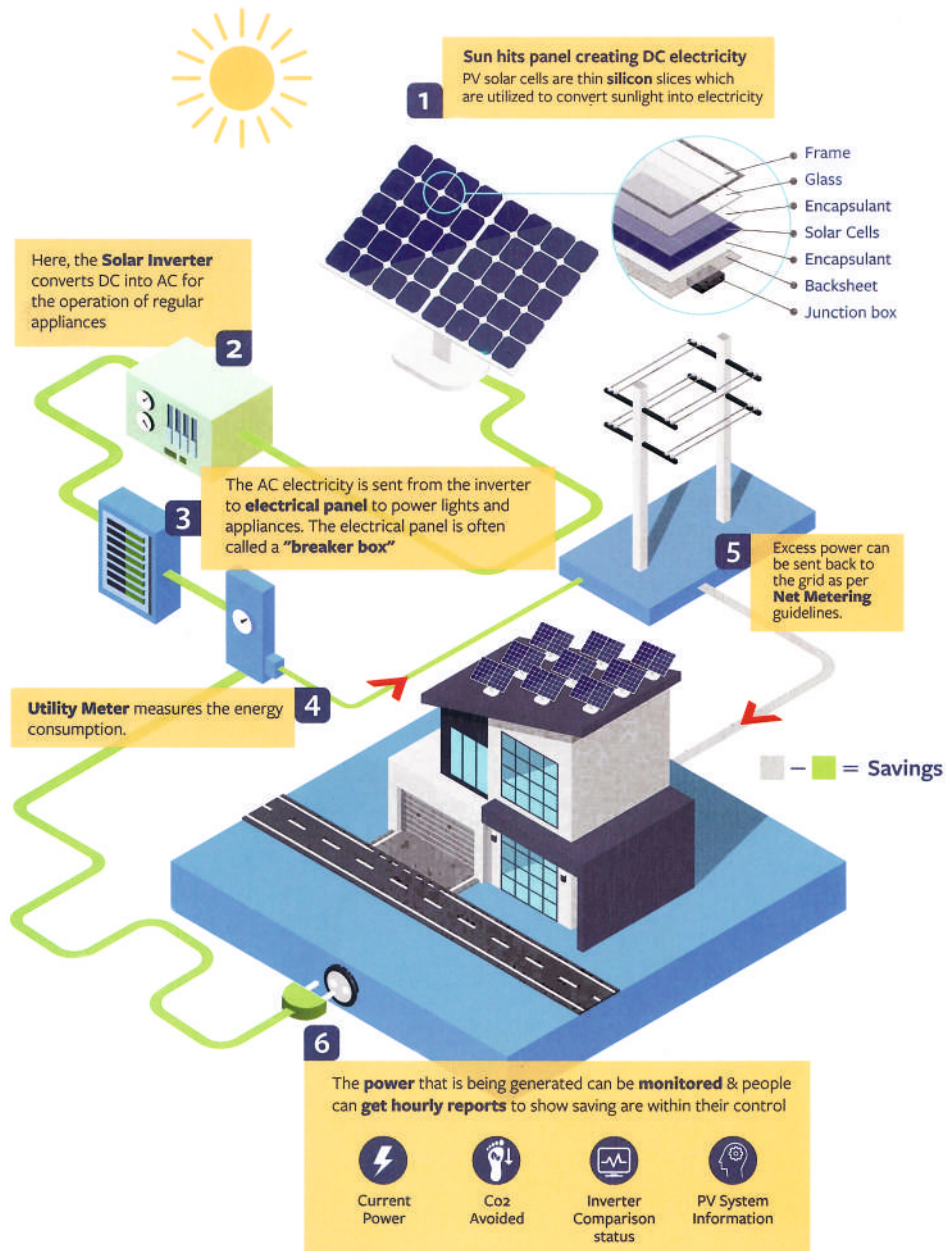

- Minimize your electricity bills.
- 25 Years module power output warranty.
- Protection from future tariff hike.
- Optimum O&M cost.
- Positive impact on climate change.
- Tax Benefit.
- Reduce the heat trap to your property.
- Reduce carbon foot print.

Why Us?

- To Facilitate multiple, flexible, customised low cost solutions.
- We Improve technology leading in best class engineering.
- Experience up to 2 Mega Watt Capacity.
- We have partnership with leading investors for Power Purchase Agreement
- Efficient Government Liaisoning Services

HOW DOES GRID TIED SOLAR WORK?

RCC ROOFS

INDUSTRIAL SHED

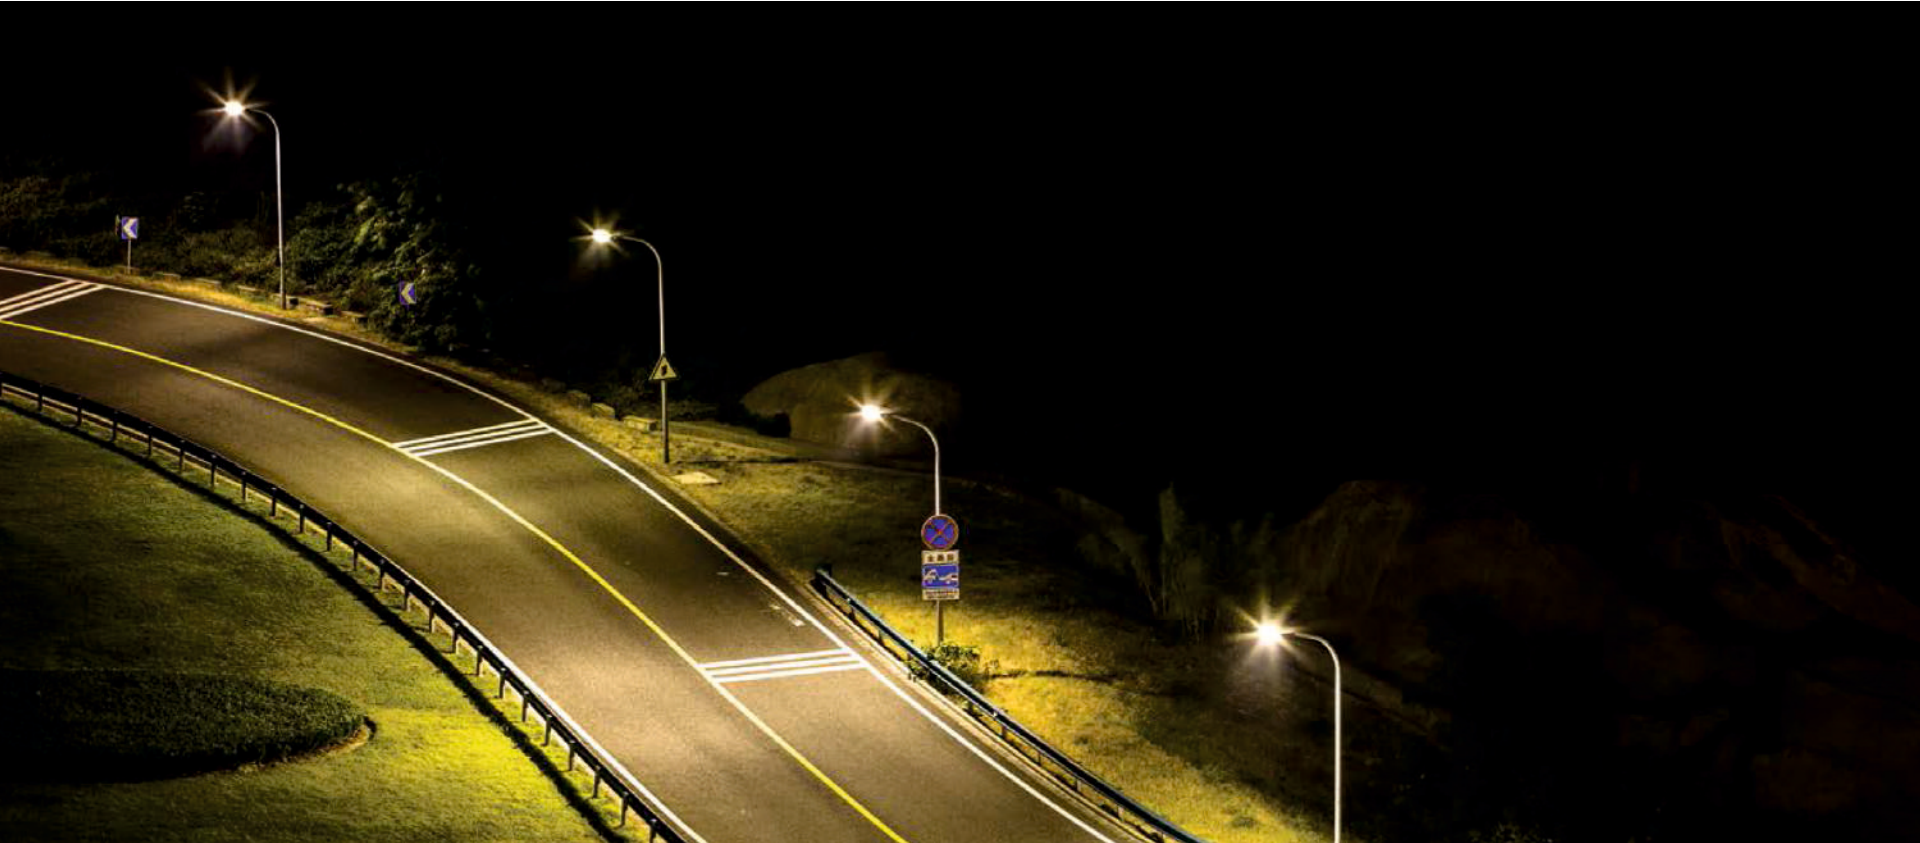

GROUND MOUNTED

OFF GRID SOLAR PLANT

Off grid solar plant is a wonderful technology for use in areas where **electricity is scarce**. It allows you to have control over the supply of electricity with storage facility in a **Battery Bank**.

SOLAR STREET LIGHT

Our Solar Street Light comes in wide range of luminary - 8W to 30W. They have wide range of applications from housing, commercial, streets and even remote locations.

- Solar Street Light with lithium/led acid battery options.
- All-in-one solar street light with lithium batteries.
- Semi integrated Solar Street Light with lithium batteries.

SURFACE/SUBMERSHIBLE SOLAR PUMP

We have developed solar powered pumps ranging between 2 Hp & 10 Hp that can run on either DC or AC current Supply, Application of these pumps are used for industrial, agricultural and domestic purpose.
